PUBLIC NOTICE

BEFORE THE HEARING BOARD OF THE GREAT BASIN UNIFIED AIR POLLUTION CONTROL DISTRICT

To consider the granting of a Regular Variance to LADWP, Case No. GB11-03

Pursuant to California Health & Safety Code § 40826(d) the public is hereby notified that a hearing will be held before the Great Basin Unified Air Pollution Control District Hearing Board to consider a petition in the matter of a Regular Variance requested by the City of Los Angeles, Department of Water and Power (LADWP). The hearing will be held at the LADWP multi-purpose room, 300 Mandich Street, Bishop, California, Thursday, December 15, 2011 at 9:00 am. LADWP is requesting that the Hearing Board grant variance relief in anticipation of a violation of mandated dust controls required under Board Order 080128-01 due to catastrophic damage to the water delivery system for the shallow flood dust control measure that was caused by a broken pipe fitting. LADWP anticipates that shallow flood areas T23 through T30 located west of Keeler, CA may become non-compliant before repairs are completed. This shallow flood area covers 11.3 square miles and is a portion of the 40 square miles of dust controls currently in operation at Owens Lake. It is anticipated that it could take several months to complete repairs.

Interested persons wishing to attend the hearing should notify the Hearing Board Clerk, Tori DeHaven, at (760) 872-8211 or via email at tdehaven@gbuapcd.org, no later than December 8, 2011 to be notified of any schedule changes for the hearing.
